## **Gnostica Stickers**

for use in converting a tarot deck to a Gnostica deck

## **Instructions:**

Cut squares around the 40 icons at the top and stick one on the upper left corner of each minor arcana number card. Cut rectangles around the 16 icon pairs in the middle and stick one on the upper left corner of each royalty card, with the empty icon at the bottom. Cut longer rectangles around the 22 icon triplets at the bottom and stick each one on the upper left corner of the correct major arcana card. Do not put the stickers too close to the edge of the card. We also suggest you color in the rods with green, swords with red, cups with blue, and discs with yellow, using colored pencils.
